

Stanley Zhu

stanleyz@uchicago.edu | 1720 Villa Street, Mountain View CA | 872-303-8649

EDUCATION

The University of Chicago

Chicago, IL

Bachelor of Science in Computer Science and Mathematics with Honors

Sep 2019 - Jun 2023

- **GPA:** 3.95/4.00, Summa Cum Laude
- **Relevant Coursework:** Operating System, Computer Networks, Database, Honors Analysis, Machine Learning, Statistical Methods
- **Honors:** Phi Beta Kappa; Dean's List (2020 - 2023); 2021/2022 ICPC Mid-Central USA Regional Contest Silver

PROFESSIONAL EXPERIENCE

Google

Sunnyvale, CA

Software Engineer

Jun 2023 – Present

- Implementing high performance virtual machine as a native scheduling class in Google's cluster management system
- Designed new backward-compatible state management protocols for task lifecycle management, and laid the groundwork for first-class sidecar support
- Communicated and aligned with partner teams to deliver milestones on schedule, and built qualification pipelines for productionization

Google - Cloud Infrastructure

Sunnyvale, CA

Software Engineering Intern

Jun 2022 – Sep 2022

- Designed and implemented a tool for collecting a task's runtime dependencies from within the fleetwide cluster management system (Borg), as part of an effort to enable live task migration and save compute
- Improved tool stability and reduced technical debt by building hermetically and decoupling it from node agent
- Built familiarity with container isolation solutions, integration testing, and software rollout process

RESEARCH EXPERIENCE

The University of Chicago Booth School of Business

Chicago, IL

Research Assistant

Jan 2021 – Jan 2022

- Researched with Prof. Dacheng Xiu on finding effective factors in asset pricing using linear regression and PCA
- Used Pandas to construct alphas that were employed in online forums and tested their efficacy on historical data
- Replicated paper *Buffet's Alpha* and reconstructed time series to explore Buffet's leverage, public holdings, etc.

UChicago Math Research Experience for Undergraduates (REU)

Chicago, IL

Participant

Jun 2020 – Sep 2020

- Researched probability, focusing on loop erasure random walks, and the Schramm-Loewner Evolution while attending faculty lectures and discussions
- Authored an expository paper titled "An Introduction to Loewner Theory" and partnered with a graduate mentor to study complex analysis and probability

Hiroshima University

Hiroshima, Japan

Research Assistant

Jul 2020 – Aug 2020

- Implemented state-of-the-art few-shot learning algorithms including prototypical network and relation network, compared results across different architectures such as AlexNet, VGG-16 and different loss functions
- Improved distortion invariance through initializing with weights of a twin network to minimize the distance between the output vectors of original and distorted images

EXTRACURRICULAR ACTIVITIES

Maroon Capital

Chicago, IL

Club Member

Oct 2020 – Jun 2021

- Participated in a quarter long curriculum covering topics such as statistics, asset classes, and financial accounting
- Coded a systematic trading strategy of S&P 500 companies, analyzed its returns and presented to board members

Game Design Club

Chicago, IL

Club Member

Oct 2019 – Present

- Collaborated on a VR game that runs on Unreal Engine, rendering an ancient library, in which players can pick up books and read in game
- Wrote C++ scripts for importing existing literature into the virtual library

SKILLS

Languages: English (Fluent), Chinese (Fluent), Japanese (Conversational)

Technical Skills: Proficient in C, C++, Python, Rust; Intermediate in R, Java, Haskell
